

Dance™ Paso Doble Cabbage Palm
Cordyline 'Paso Doble'

Height: 6 feet

Spread: 5 feet

Sunlight: ○ ●

Hardiness Zone: 8

Other Names: Cabbage Tree, Giant Dracaena

Description:

Striking leaves of deep burgundy-purple, edged in brilliant pink; spectacular when massed on the landscape; perfect for adding a lush, tropical look to the garden or containers

Ornamental Features

Dance Paso Doble Cabbage Palm features showy panicles of fragrant white flowers in early summer. It has attractive burgundy foliage edged in hot pink with hints of purple. The sword-like leaves are highly ornamental and remain burgundy throughout the winter.

Landscape Attributes

Dance Paso Doble Cabbage Palm is an open multi-stemmed evergreen shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This shrub will require occasional maintenance and upkeep, and should never be pruned except to remove any dieback, as it tends not to take pruning well. It has no significant negative characteristics.

Dance Paso Doble Cabbage Palm is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- Container Planting

Planting & Growing

Dance Paso Doble Cabbage Palm will grow to be about 6 feet tall at maturity, with a spread of 5 feet. It has a low canopy with a typical clearance of 3 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 10 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is somewhat tolerant of urban pollution. This particular variety is an interspecific hybrid.

Dance Paso Doble Cabbage Palm makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, this plant may be too tender to survive the winter if left outdoors in a container. Contact our experts for more information on how to protect it over the winter months.
